

- Help patients to achieve optimal health outcomes

Comments by the sub-committee include:

- Are students allowed to opt to minor in a different area (e.g., public health) if they choose what they want).
- Does the concentration in IPE give the student an over-representation (res, but the "triplicate" the concentration).
- Does this program teach students to work with outpatients, as well as inpatient? (The program is very important to ambulatory care and to centers).
- Are all IPE courses offered in the first two semesters?
- Do the students have to take PHH 105 and PHH 205? (PHH 205 does not require PHH 105).
- There needs to be a clear understanding of the differences between the two courses.

Dr. Whitt proposed that the GIS proposal needs to have changes made before a decision can be made by IAC. Dr. Whitt asked the committee to send an additional comment to the IAC.

Dr. Sanchez said more clarity of imbedded assessments is needed before the proposals can go forward for approval.

The committee will vote on the proposals at the November IAC meeting.

The meeting adjourned at 10:00 am.
