I. **Approval of Meeting Minutes – January 11, 2024**

The motion to approve minutes was put forward by Jesse Helton and seconded by Tony Breitbach. Minutes were approved.

II. **Academic Programs:**

a. Micro-credentials

- Billiken Career Advantage (First Year Students) (CIM 680) – Floyd Welsh, Career Services
- Billiken Career Advantage (2

nd Year/ Sophomore Students) (CIM 681) – Floyd

Welsh, Career Services

- Billiken Career Advantage (3rd Year/ Junior Students) (CIM 682) – Floyd Welsh, Career Services
- Billiken Career Advantage (4th Year/ Senior Students) (CIM 683) – Floyd Welsh, Career Services

All requirements for the four micro-credentials are at a satisfactory level to move forward. Dr. Welsh provided a brief intro at the UAAC meeting on how they use AI and will continue to use AI. He also discussed the onboarding process. Resumes will be submitted via handshake and an in-person meeting will be scheduled to have a deeper discussion.

Things to take back to Career Services:

- Should there be some greater indication of the learning outcomes?
- How do we confirm that the students met the criteria and are not only earning a participation mark?

- Explore with a little more richness what are the outcomes they are hoping to achieve and how will the assessment of those outcomes be fed back into the program for improvement.
- Administration – rolling from 27 to 42 credits. Think through administration of it. Is it wise to try to do all four of these – from the beginning.
- Is there a human element in any of this. What does it require of Floyd or anyone else in Career Services? AI is giving feedback to the student regarding the interview. No human being gives feedback to the students.
- Are we requiring academic micro-credentials standards on a skills and competency micro-credential?
- Year two and year three need more clarification and focus on career goals.
